Phonics Kriss-Kross Puzzles are simple logic puzzles.

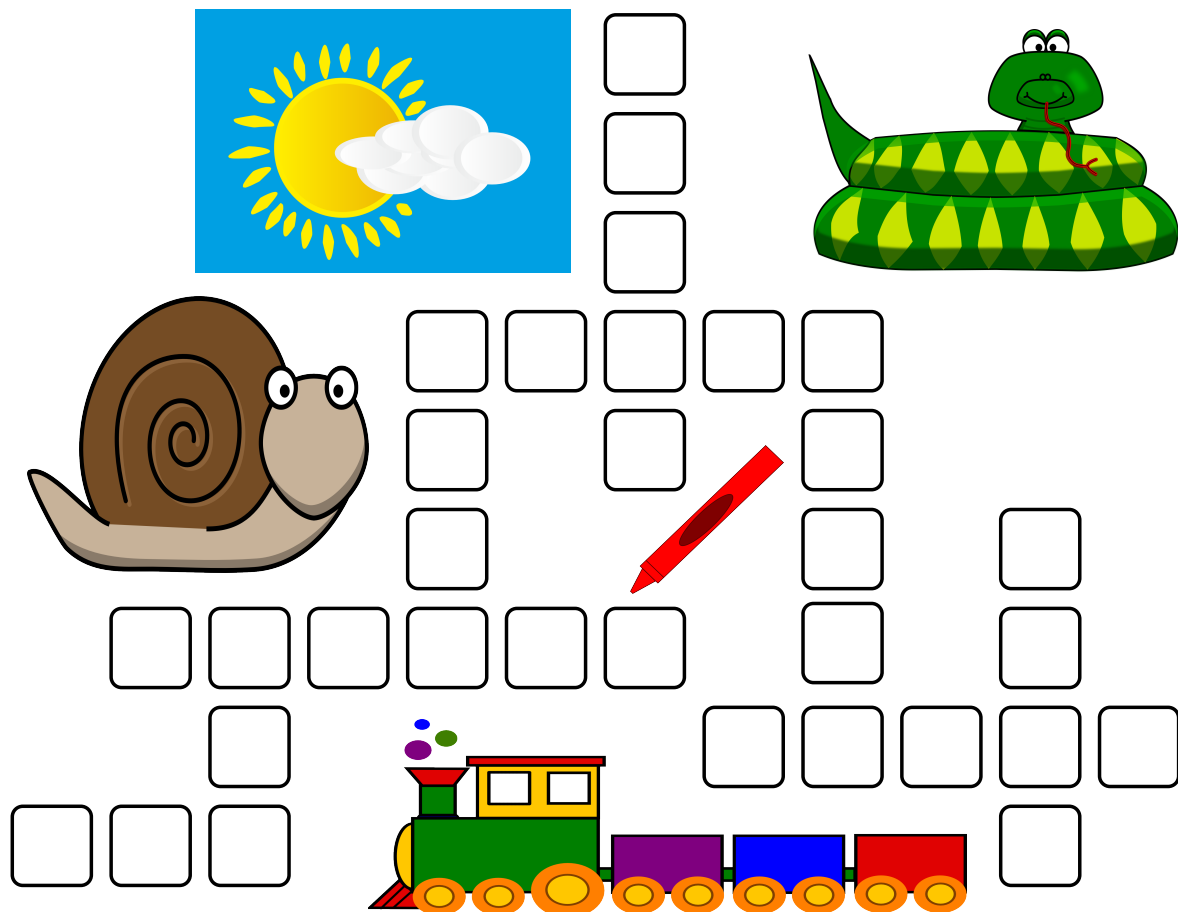

Practice logical thinking and 'sequencing': doing steps in the right order. At the same time practice reading, writing, spelling and counting.

## Instructions

- You must fit all the words into the grid.
- Before placing a word, make sure no other word can go there.
- If only 1 word is left of any length, there is only 1 place it can go.
- Look for clues in the letters already in the grid. Which words fit with them?
- Cross off the words you have used.

Logical thinking is an important skill for all.  
It is the foundation of being able to program and  
much more.

Anyone can do it. You just need to practice.  
The more puzzles you do, the better you will get.
