

## The Knights Templar

The Knights Templar were warrior monks. They invented a way to move money around safely. They kept the money in their castle, but gave the person a note to hand in at a castle in another country. The Knight there gave them money for the note. The notes were encrypted so were useless if stolen. Only the Templar's could read them.

## The Templar Cipher Puzzle 1

The Templar's cipher uses symbols based on their flag's triangles. To encrypt a message swap letters for symbols. (They had no J).

Here is HELLO  
written in their  
cipher.

# The Templar Cipher Puzzle 1

Can you decrypt this message?

Now write a message of your own in the Templar cipher.
