

Love letter generator puzzles

A computer program generates love letters by picking random words from lists of verbs, nouns, adjectives and adverbs. This allows it to generate letters such as

Beloved Little Cabbage,
*I pine for **your** wistful devotion.*
***You are my** cuddle-bear.*
*I want to hold **you forever**.*
***You are my** burning desire.*
***My** affection lovingly yearns for **your** sympathetic passion.*
***Yours,** keenly, Muppet.*

Here the words in italic were picked by the computer. Each line is generated by a template. For example

***You are my** burning desire.*

is based on the following template where an adjective (like burning) and a noun (like desire) must be provided:

***You are my** ADJECTIVE NOUN .*

Work out what templates must have been used by the program in each of the following cases: Choose either NOUN, VERB, ADJECTIVE or ADVERB in each case.

1. **You are my** cuddle-bear.

You are my _____ .

2. **I want to hold you forever.**

I want to _____ **you forever.**

3. **I pine for your** wistful devotion.

I _____ **your** _____ .

4. **My** affection lovingly yearns for **your** sympathetic passion.

My _____ **your** _____ .
