

Logical Thinking: 4x4 Sudoku Puzzle 2

Fill in the grid so that each row, each column and each corner box of four squares contains each of the numbers, 1, 2, 3 and 4.

	2		
		4	
2			1
	3		

HINT: Find a row with more than one number already filled in. Check if numbers in the columns block what numbers could be in the gaps.
